

ATTENTION WASH YOUR HANDS!

Hand washing

Hand washing is one of the best ways to minimize the risk of infection. Proper hand washing helps prevent the transfer of infectious material from the hands to other parts of the body - particularly the eyes, nose, and mouth or to other surfaces that are touched. Wash your hands immediately:

- **Before leaving a work area.**
- **Before and after using tools and machinery.**
- **After handling materials that may be contaminated.**
- **Before eating, drinking or smoking.**
